github.com/utkukilincci | Medium: medium.com/@utkukilincci

PROFESSIONAL SUMMARY

Highly motivated and detail-oriented Software Developer in Test specializing in both
functional and non-functional testing across web, mobile, and API platforms.
Experienced in developing effective test automation solutions using a wide range of
tools and frameworks. Strong focus on continuous learning and adapting to industry
innovations. Currently leading the Test Guild at Trendyol, facilitating knowledge sharing
among QA engineers.

PROFESSIONAL EXPERIENCE

Senior Software Developer in Test

Trendyol

May 2021 - Present

Responsible for testing and quality processes of microservice-based services,
microfrontend-based front ends, mobile applications, and queue systems. Leading the
Test Guild where all QA engineers at Trendyol share and present various technologies
and innovations.

- Generate and maintain AI-assisted workflows for improved testing efficiency
- Lead the Test Guild, fostering knowledge sharing across QA teams
- Implement and maintain Playwright for web functional automation tests
- Utilize Visual Regression Tracker for comprehensive web visual testing
- Develop API automation tests using RestAssured with Kotlin
- Create and maintain mobile functional automation tests using Detox
- Conduct monthly performance tests to ensure system reliability
- Implement contract testing strategies for microservices

Software Test Engineer

Testinium

November 2020 - April 2021

Responsible for creating front-end test automation suites with Gauge framework for
TEB.

- Wrote and executed comprehensive test cases for web applications
- Performed functional testing across multiple platforms

- Reported test results and defects with detailed documentation
